### Natural Sunscreen SPF 30 & Mineral Lip Balm

Titanium dioxide and zinc oxide offer natural, sun protection, are anti-inflammatory and help calm the skin. Zinc oxide also has antimicrobial properties. The light mineral powder lets skin breathe naturally and does not settle into pores.

Mineral makeup (lip balm), is simple and the most natural product you can put on your skin. "Mineral makeup" takes its inspiration from minerals and inorganic pigments that exist in nature. Some mineral pigments are matte, some have a slight shimmer, and some are positively sparkling!

Mica is a transparent mineral, which is mined from the earth in thin sheets. It is often treated with iron oxides to yield brilliant color effects. Due to the sheer, translucent and skin-hugging effect of the mica mineral, your natural skin tone shines through cosmetics containing mica powder. It reflects light from the face, creating the illusion of a smoother, softer and radiant skin tone. Fine lines are softened and skin texture appears more translucent with a luminous glow.
